

AKB Temporary Hours and Design Process

To protect everyone's safety Artistic Kitchens & Baths will be open by appointment only during the Covid-19 emergency. Please call 910 691-7099 or 910 691-1666. Please do not bring children.

To reduce face to face time:

Bring a general budget allowance for cabinets and counter-surfaces.

For new construction: Bring Plans so we can copy the necessary rooms.

For Remodeling:

- Measure the room (inside wall measures in inches)
- Place windows and doors in the room (including window and door dimensions with window distance from the floor)
- Appliances including the item number, width, height and type.
- Placement of the current appliances and sink (If you plan to move the appliances in the remodel let us know where they are currently and what you want to change about the current design. If there is an island or peninsula, please include.
- Include Hood placement over the cooking surface (wall or undercabinet)

Once we have an idea of what your design needs are, we will use a rough drawing as a starting point to obtain a concept and general estimate while we wait for activity to normalize. Before any order can be executed an onsite measure will be required but much can be done by phone and email.

All our cabinet vendors are manufactured in the United States and require 6-8 weeks. While we are following social distancing AKB is glad to work with you on the design portion of your project through email and phone.

If you prefer to email plans rather than coming in to the AKB showroom, we can work with you via phone and email to come up with basic ideas for your consideration.
